DISCOVER OUR MINIATURE BOXES

We invite you to discover our selection of vinaigrettes, small boxes used to contain vinegar or perfumes.

Vinaigrettes were often used to neutralise unpleasant odours, particularly in urban environments where sanitary conditions were not always optimal. These objects were often carried on the person, in the form of small boxes, and contained a cloth soaked in vinegar or perfume.

Our chased gold vinaigrettes are sometimes adorned with precious stones, micromosaics or beautiful enamel decoration. They are fitted with small grids to release the perfume or vinegar.
